

How Invisalign treatment works.

Your child can get their new smile in **3 easy steps**.

First.

The consultation

At your initial consultation, your Invisalign-trained doctor will help visualise your child's future smile using an iTero scanner¹⁰ and tools that show **3D Images** of your child's teeth.

The doctor will then use ClinCheck software to map out the journey to your child's new smile, allowing you to see the **movement of each tooth** and providing you with an estimated treatment timeline and plan.

Then.

The treatment

Your child will receive a series of custom-made aligners to wear every day and **change at home**, on average every 1-2 weeks.

They can comfortably be worn for the recommended **22 hours a day**.

Progress is monitored by a doctor every **6-8 weeks**.

Finally.

The results

Your child's new smile is here! Thanks to Invisalign clear aligners, this is achieved **faster^{3,4} than with braces** - average Invisalign treatment lasts 12 to 18 months.⁷

Their smile is easier to maintain with Vivera retainers, which are trimmed based on each patient's gum line to provide optimal comfort and aesthetics.

Ready to see your child's smile take shape?

2. Compared to Invisalign aligners previously made from single-layer (EX30) material.
3. Gu, J et al. Evaluation of Invisalign treatment effectiveness and efficiency compared with conventional fixed appliances using the Peer Assessment Rating index. Am J Orthod Dentofacial Orthop February 2017;151:259-66.
4. Buschang, P et al. Comparative time efficiency of aligner therapy and conventional edgewise braces. Angle Orthodontist, Vol 84, No 3, 2014.
5. Data on File at Align Technology, as of July 12 2017: *Based on a global claims survey by Actionable Research of Invisalign providers, respondents were asked the following question: In what percent of cases do patients require an emergency visit? (Global respondents N= 898).
6. In a pain score of 1-9, 1 being extremely painful and 9 not at all painful, Invisalign U.S. teenager patients (Qty:73) rated pain score of 6.1 vs U.S. traditional metal braces teenager patients (Qty: 76) rated pain score of 5.1.
7. Based on two week wear.
8. Data from a global survey of 70 orthodontists in NA, EMEA & APAC that were experienced in treating teenagers with permanent dentition with Invisalign clear aligners (minimum of 60 cases, past 12 months). Data on file at Align Technology, as of June 10, 2021.
9. Invisalign Virtual Care was made available in the context of the Covid-19 pandemic and government-imposed restrictions on patient mobility due to health and safety reasons. This tool is designed to connect Invisalign providers with their existing patients and support practice in ensuring treatment continuity. Invisalign Virtual Care is not a replacement for office visits. Patients will need to come to the office as determined by their doctor.
10. Some providers might still take physical impressions.

invis is over 3 million¹ straighter teen smiles worldwide.

invis is customised care for your child's unique needs.

Invisalign clear aligners are **custom-made** to fit individual requirements. Your child will enjoy more predictable² and comfortable² teeth straightening thanks to our patented SmartTrack technology.

Your child will also receive expert care and support throughout their treatment from your trusted **Invisalign-trained doctor**.

Key advantages of Invisalign clear aligners for your child.

Clinically proven to improve control of tooth movement.

Engineered to straighten teeth more predictably².

Almost invisible to encourage confident smiles.

To help encourage wear and track compliance, doctors can apply a blue dot which fades with use.

Discover the advantages of Invisalign treatment.

With Invisalign clear aligners, the difference compared to fixed braces is clear. Invisalign clear aligners are:

More predictable

Made of **SmartTrack material**, so they're more comfortable² and allow more predictable² tooth movement.

Fast & efficient

Are proven to straighten teeth on average 5 months faster than fixed braces^{3,4}. Plus emergency visits are almost **80% less frequent**⁵.

More comfortable

Custom-made for your child's teeth. They are laser trimmed to fit your child's exact gumline, offering a comfortable fit and move teeth with less pain than braces⁶.

Lifestyle friendly

Fit in with your child's lifestyle. They are **easily removable** to allow for better oral hygiene. Your child can brush and floss as normal and continue enjoying their favourite foods and activities.

Wondering if Invisalign treatment is the **right fit for your teenager?**

Below you can find some answers on most common questions about Invisalign treatment for teenagers.

01

Is Invisalign treatment proven to work for teens and my child?

Yes. Based on years of research and intelligence gathered from more than **3 million teen smiles**¹ worldwide, we create treatments that can correct a wide range of adult and teen teeth straightening issues, from simple to complex cases.

02

How long will treatment usually last and how predictable it is on growing patients?

Invisalign treatment typically lasts **12-18 months**⁷. Invisalign clear aligners are made from patented SmartTrack material which allows more predictable² tooth movement.

03

I am worried about compliance, will my teen wear Invisalign clear aligners regularly?

98% of experienced Invisalign Orthodontists say teens in their practice are compliant with Invisalign treatment⁸.

To help monitor recommended wear of aligners, the **My Invisalign App** keeps teens on track with notifications and reminders. There is also a possibility of regular online face-to-face check ups with their doctor through **Invisalign Virtual Care**⁹ to ensure effective monitoring and compliance.
